BILLET POLISHED LIGHTS WITH LED OR STANDARD LAMPS

Made to fit in flat panels. Available for any year, make and model. Light fits in 1-1/4" diameter hole. Requires 2-1/2" depth behind light for wiring. Includes retention ring. LEDs - These lights are made of billet aluminum with a polished bezel. The clear lens protects the 12 volt LED light inside. Select White for backup lights or Amber for turn signals. The Red lamp is dual intensity for applications combining the running lamp with turn signal or brake lights. All lighted hole caps come with approximately 10" pigtail wires. Lighted - These lights are made of billet aluminum with a polished bezel. Includes lens and 12 volt light. The bulb is a type 194 miniature single filament bulb commonly used in GM sidemarker applications. Connect to your existing light or turn signal for extra visibility. **MADE BY MAR-K IN OKLAHOMA CITY, USA.** For lights to fit in bed side curls, see page 46.
