

Wood Bed Marine Spar Varnish

FINISH IT™

BASIC APPLICATION INFORMATION

SURFACE PREPARATION:

Ensure all bolt holes are drilled before applying FINISH IT™ varnish. The surface must be free of dirt, dust, mildew, wax, oil, foreign matter and totally dry. Use a flat sanding block & sand with 120 grit, follow up with 220 and/or 320. Sand in direction of the grain. Round all sharp edges to at least 1/16" radius to allow for FINISH IT™ varnish coverage. Remove all sanding dust before finishing. Sand in a separate room from paint room.

APPLICATION

Use only when the surface and air temperature is over 50°F. Finish wood before installing on car/truck to allow for coating coverage on all surfaces. Use a china bristle brush, high density foam roller or lambs wool paint pad to apply. On first coat, thin varnish with a 9:1 varnish to mineral spirits mix. Thereafter, coat with 100% FINISH IT™ varnish. Coat all edges, ends of boards, inside all drilled holes and top & bottom surfaces. Saturate the ends of boards with FINISH IT™ varnish. Allow to dry overnight between coats. Clean brush thoroughly between coats. Sand between coats with a sanding block and 220 grit. Only remove brush/roller marks or orange peel. Be sure to remove all sanding dust from the part and environment. Recoat to obtain at least 3 full coats. Do not sand after the final coat. Inspect regularly after installation and repair or refinish any damages.

FINISH IT™ WOOD BED MARINE SPAR VARNISH

- MAR-K™ FINISH IT™ Wood Bed Marine Spar Varnish is a clear urethane-phenolic varnish for use on automotive wood flooring.
- Formulated with an ultra-violet screening agent, FINISH IT™ will hold its gloss on exterior surfaces far better than conventional varnishes.
- Excellent for use on car and pickup truck wood floors where a durable clear gloss finish is desired.
- Kits are available for Short and Long Bed trucks. One quart (.0496 L) cans are also available for purchase.
