

TAILGATE PAINT MASKS - This CNC machined aluminum plate is made to mask around the embossed letters in GM tailgates made by Mar-K. It is an exact match for the GM logo on Mar-K tailgates. Simply place the mask over the GM logo to expose only the embossed letters for the perfect painted tailgate. Included are magnetic pieces to mask the center of the "R" & the "O". **Please note this mask should only be used to paint tailgates made by MAR-K as it may not match the shapes of GM tailgate letters not stamped by MAR-K.**

WOOD FLOOR TIE DOWN - An aluminum tie-down anchor point for truck beds with a wood floor. Classic trucks with wood bed floor do not have anchor points for attaching tie-down straps. These polished aluminum sockets are installed in the bed floor at points of your choosing and the included stainless steel eyebolt threads into the aluminum socket providing a sturdy anchor point for tie-down straps. The eyebolt is easily removed so the floor is smooth when the eyebolt is not needed. This system is perfect for holding light loads from moving around in the bed. It depends on the strength of the wood floor so is not intended for heavy loads such as a motorcycle or engine block. Stainless steel hardware for attachment to the wood floor is included. Installation requires drilling into the wood floor and refinishing the wood as needed. Complete installation instructions are included. Drill bits for installation may be purchased separately.
