

# Raise your Floor and Drop your Bed!

Left, this 1954 Chevrolet bed made by Creighton Harmon included a MAR-K™ 3" raised floor kit on his on a 1947-53 Morrison frame. Below, Jonathan Ward, ICON, used a MAR-K™ 2" raised floor kit for this 1951 Chevrolet Thirftmaster on a Morrison frame.

## RAISED FLOOR KITS

**MAR-K's™** new Raised Floor components are perfect for Drop Beds to fit custom or stock frames. These parts raise your bed floor so the truck frame and suspension can be modified for EXTREME LOWERING. We supply raised floor components for almost any height from 2" to 8 1/2". For the standard 2" or 3" raised floor – a more moderate drop for your bed – MAR-K™ can provide either the complete bed kit or the parts needed to modify your existing bed. MAR-K™ custom makes your bed sides with the raised floor upgrade to save you time and money at the body shop. Just select the complete Raised Floor Kit for your year truck. It is that easy to drop your bed and raise your floor!  
**COMPLETE RAISED FLOOR KIT + WOOD BED KIT + TAILGATE = COMPLETE DROP BED**

Raised Floor Kit for Ford shown above - Complete Raised Floor kit includes everything you need to build a bed with a 3 inch raised floor. Add the wood bed kit and tailgate and you are ready to go!

#### Complete Raised Floor Kit-

- Complete raised floor metal parts bed kits include the metal parts to build your complete bed assembly with the bed floor 2 inches or 3 inches above the stock location, depending on the year of your truck. This includes custom bed sides, cross sills, front panel, rear sill, rear sill extension panel and risers for the rear sill and front cross sill. The parts are designed to match the year of your truck. They have bolt holes for assembly and zinc plated steel fasteners are included. Order your bed wood kit and tailgate separately.
- If you are modifying your existing bed to raise the floor we have the parts needed to do that. These component parts are available on our Online Store. Most applications will require custom hidden bolts cross sills, 2" or 3" risers and the rear sill extension panel. Angle strips are available to attach the bed wood to the bed sides. As with the standard complete bed kit, order your bed wood kit separately.
- The metal parts in these kits are manufactured of 16 or 12 gage steel so you can be assured your raised floor bed will be as strong as original. Parts are ready to primer and bolt together; bolt holes and hardware are included.
- See pages 54-63 to select your tailgate from the many options available. Bed side upgrades may be required to work with some tailgate options. Bed side upgrades are listed on pages 49-50.

**New models are in development! Call our office or check our website if your truck is not listed.**
